## The Engine Parts, Cores, & Recycling Partner You Can Count On, Now and Into The Future

EngineQuest traces its roots back to Chicago, when Aaron and Alex Stolberg began buying cores and selling them to rebuilders in 1949. The pair built their business into one of the premier core suppliers that specialized in Engines and Transmissions. After Alex retired, Aaron's two sons joined the business. At that time, the majority of the company's customers were on the West Coast, so in 1986, a warehouse distribution center was opened in Los Angeles. This allowed the company to better serve its customers, and to do so much faster.

This led to a period of immense company growth and a new state-of-the-art facility in Chicago in 1990, followed by the Los Angeles warehouse moving to Las Vegas in 1992. At the end of 2020, the Chicago and Las Vegas locations split into two separate businesses to create new and innovative ways to fulfill customers' needs and continue to grow.

In 1987, while the company was expanding, customers began asking for certain used parts that were either unattainable or not available in good condition. This is when we began making new engine parts. Today, EngineQuest specializes in making parts that are no longer available or were never available from the OEM. True to our roots, we also specialize in parts that are hard to salvage or whose OEM cost is prohibitive.

EngineQuest makes high-quality parts and pairs them with outstanding customer service at a competitive price. Quality goes into every part we make, from outside testing when necessary, to stringent internal inspections upon receipt of all goods. All of our parts are manufactured to our exacting specifications and come with the EQ difference.

With almost 500 new part SKUs available, EngineQuest also maintains a core inventory of 8,000 engines, 2,000 transmissions, and tens of thousands of component part cores. By being on the front line of supplying the raw material (cores) to the remanufacturing industry, EngineQuest has a unique insight into what parts are in demand and can become difficult to get or are hard to salvage. This has led to our continued introduction of new items, along with customers' requests.

While our buyers are in wrecking yards acquiring transmission and engine cores, they also work to help the wrecker get the most value for their recyclables, such as aluminum wheels, harness wire, radiators, and batteries. In addition, we serve the local community as a recycler of non-ferrous metals. By specializing in these two areas, we have been able to provide value-added service to our suppliers while offering them top dollar.

Our team looks forward to helping you with all your needs in Engine Parts, Cores, and Recycling, now and in the future.

## LS HYBRID CYLINDER HEADS

- Out-of-the-box, bolt-on performance
- Engineered to be modified from stock to high performance with ease
- Works with applications of 4" bore & larger
- Upgraded 6-bolt block capability
- 15° valve angle with LS3 1.7 rocker ratio
- Accepts stock LS3 valve train parts
- Integrated rocker support towers, **MUST** use LS7 rocker bolts
- Combustion Chamber 69 +/- 2 CC
- Intake Runner 246 +/- 5 CC / Exhaust Port 69 +/- 5 CC
- Intake Valve Size 2.165" / Exhaust Valve Size 1.60"

PART #	DESCRIPTION
<b>NEW! EQ-CH364X</b>	BARE
<b>NEW! EQ-CH364XA</b>	ASSEMBLED

## LS HYBRID CNC CYLINDER HEAD

- CNC machined for performance in large bore and boosted applications
- 15° valve angle with LS3 1.7 rocker ratio
- Accepts stock LS3 valve train parts
- Integrated rocker support towers, **MUST** use LS7 rocker bolts
- Works with applications of 4" bore & larger
- Upgraded 6-bolt block capability
- Combustion Chamber 72 +/- 2 CC
- Intake Runner 269 +/- 2 CC / Exhaust Port 100 +/- 5 CC
- Intake Valve Size 2.165" / Exhaust Valve Size 1.60"

PART #	DESCRIPTION
<b>NEW! EQ-CH364X-CNC</b>	CNC MACHINED

## COMPATIBLE INTAKE MANIFOLDS

The following intake manifolds are compatible with the EQ-CH364X, EQ-CH364XA, and EQ-CH364X-CNC cylinder heads, and will depend on if you are running with Carbureted or Fuel Injection.

- All LS7 Intakes, including Stock OEM LS7
- Chevy Performance LS7 Aluminum Intake #809-25534413
- Fitech Fuel injection intake #546-70078
- Holley single plane EFI intake #510-300-269
- Fast LSXR intake manifold #FST146202B

## SYSTEM COOLANT PLUGS

### Chevrolet LS

All cooling systems need high-quality components to function well and provide maximum cooling ability. EngineQuest coolant system air bleed plugs are made of steel and are designed to bleed air from cooling systems to avoid any major issues. It's highly recommended that two air bleed plugs be used per engine to complete the bleeding process, for the very best results.
